Package includes:

SmarConf™: Configuration software for Windows in a CD
SmarKey™: USB license hard key that enable the software to run Online

Features:

▪The best configurator, maintenance and troubleshooting tool for SMAR HART® devices
▪Install the configurator in various computers and place the SmarKey™ to run it Online
▪Use the internal PID controller, Volume Totalizer, and set the characterization curve
▪Program the Root extraction for flow calculation and choose a User Unit
▪Recognizes HART® devices from other manufacturers or treat as generic devices
▪Can work ONLINE or OFFLINE. Upload, download, and save configurations
▪Real time parameters changing. NOTE: User needs to take safe precautions
▪Save configurations and keep historic graphics with up to 4 variables each
▪Track signals in real time. Great for tune-ups, maintenance, and troubleshooting
▪Loop current simulation to verify line integrity
▪Set the working range digitally or by applying a reference variable.
▪Do all this remotely or close to the device with a easy to use graphic interface
▪Use any universal USB-HART interface or get a SmarConf interface bundle
▪Compatible with Win7, Win8 and Win10
